

# 600 SERIES DIESEL

# NEW

**Aqua-Hot.**

Introducing the first and only CARB-approved diesel heating system for RVs

Now in the Aqua-Hot 600 series

Part Number	Model	Fuel	Electric Elements	Interior Heat (Max)	Hot Water (gpm)	Engine Preheating	Size	Weight
AHE-675-DO3	675D	Diesel	(1) 120 V ac 2000 W (1) 240 V ac 4500 W	12 Emitters 72,000 Btu/h	2.0	Yes	18.5"H 18.5"W 36.75"L	186 lb (empty) 303 lb (full)
AHE-600-DO3	600D	Diesel	(2) 120 V ac 2000 W	12 Emitters 64,000 Btu/h	2.0	Yes	18.5"H 18.5"W 36.75"L	186 lb (empty) 303 lb (full)

## Simplified For On-The-Line Productivity, Owner Experience and Fast Servicing

**Designed with fewer components:** Makes installation fast, lowers likelihood of errors and improves field serviceability.

**Lower service and repair costs:** There's easy access to fans, pumps, nozzle and fuel lines; electrode adjustment issues are eliminated.

**Clean installation:** Eliminated domestic water connection compression fittings; added quick-connect electrical connections.

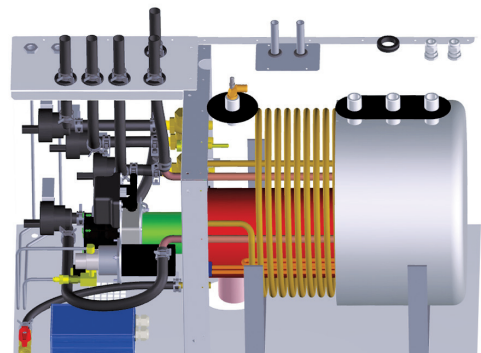

**Protects against voltage irregularities:** Expanded voltage input range is now 10.6 VDC to 16 VDC.

**Constant combustion pressure:** External pump and counter-directional brushless fans eliminate smoke and odor at low voltage.

**Extends component life:** Burner controller operates fans and pumps at separate voltage ranges.

**Owner-friendly diagnostics:** In-cabin operation switch now contains simplified blink codes for system service requirements.

**Nozzle preheater now standard:** Automatically preheats fuel starting at -30°F and will ignite the burner down to -40°F, allowing operation to -40°F.

### 600 SERIES

*The cleanest burning and only CARB approved burner system for recreational vehicles.*

*Aqua-Hot systems are certified for safe use in households, mobile homes and recreational vehicles in the United States and Canada by ETL (Intertek Testing Services)*
